Unit Managers Meeting  
Meeting Held February, 12, 1991

Summary of Discussion

WHC is ready to proceed with the proposed sampling, and to go ahead they need a NEPA categorical exclusion from DOE/HQ.

Ecology (Megan Lerchen) stated that Ecology is currently developing a departmental policy on closure standards which will be health based and will integrate both RCRA and CERCLA requirements as well as fall within the scope of MTCA.

The final 2101-M Closure Plan is expected to be delivered to Ecology by WHC/DOE by March 1st, 1991. 2101-M is a relatively uncomplicated closure because a partial closure is not needed and the only outstanding items are development of background standards and final clean up standards. Current data show there is probably ~~no~~ contamination at 2101-M Pond.

*not extensive WHC*  
ACTION ITEM: Ecology will provide DOE a letter of agreement with the proposed WHC/DOE sampling plan and instruction to proceed with the sampling.

The next meeting will be held March 12 at 1:00 at a location to be determined.
